

Harmonize Your Virtualized Infrastructure

Get in Tune with a VMware vSphere Healthcheck

» You've made a significant investment to virtualize your computing environment using VMware vSphere, the industry-leading virtualization platform. Now let the experts help you make the most of it. GovConnection's VMware Certified Professional (VCP) consultants can work with your team to provide best-practice guidance for utilizing and optimizing VMware vSphere.

VMware vSphere Healthcheck Benefits

- Analyzes your current VMware vSphere performance
- Mitigates potential risks by providing best practice recommendations
- Maximizes your resources by improving efficiencies and providing roadmaps for future improvements

What Our Expert Consultants Provide

- VCP-conducted assessment of VMware vSphere on up to 4 ESX hosts using the VMware HealthAnalyzer virtual appliance
- Identification of potential opportunities to improve and optimize your virtualized environment's performance
- VCP-lead 5-seat workshop to share and discuss VMware vSphere best practices

Requirements

- Existing VMware vSphere environment
- Root access to VMware installations
- Conference room with projector and networked desktops and/or notebooks running Microsoft Windows 2000 or higher
