

Responsible IT Asset Disposition

Find the Right Solution for Your Organization

» Sometimes making the right choice can be difficult—especially when it comes to choosing a disposal option for your outdated IT assets. At PC Connection, we eliminate the frustrations and complications from this process, so that you can focus on more important tasks. That’s why we offer two disposal services: Premium Asset Recovery and Standard Asset Disposition. These services protect your organization against embarrassing and potentially damaging outcomes, from environmental liabilities to data privacy concerns. We also offer the best solutions for remarketing and disposing of your obsolete IT assets in order to give you the most value for your IT dollars. You don’t have to do anything other than show us where the equipment is. We’ll take care of the rest.

CleanIT™ Process	Premium Asset Recovery	Standard Asset Recovery
Remarketing and Value Recovery	✓	
Data Security (DoD 5220.22M compliant 3-pass wipe)	✓	✓
Environmentally Friendly Disposal	✓	✓
Indemnification Against Data Security and Environmental Compliance Risks	✓	✓
Customized Service Level Agreements	✓	✓
Quarterly Business Reviews	✓	✓
Robust Reporting with Customizable Features	✓	✓
Logistics Planning Support	✓	✓

- **Removal**—Once your equipment is in a central location, a technician comes to your site, packages and removes all unwanted equipment, and transports it off-site for a full audit.
- **Data Security**—To ensure your data never falls into the wrong hands, PC Connection offers a data erasure service that uses a write over process approved by the Department of Defense that leaves virtually no data on your hard drive.
- **Clean**—All stickers, labels, or asset tags are removed to ensure anonymity.
- **Inventory Reporting**—A full inventory of your recycled equipment is compiled—complete with manufacturer model number, serial number, and other detailed information. This enables your company to fully depreciate recycled assets and remove them from the books.
- **Asset Liability**—An EPA-bonded Certificate of Indemnification is issued which transfers title and liability for all the disposed assets, protecting the customer from risk of loss and other risks of ownership.
- **Proper Protection**—PC Connection will perform a DOD scrub of all hard drives to protect sensitive data.
- **Recovery**—After the audit and cleaning, select IT equipment may be remarketed, providing a potential return on deinstalled assets. Best of all, remarketing is an environmentally sound recycling solution that minimizes the costs involved with disposal. PC Connection maintains a “zero landfill policy,” so you can be sure your outdated equipment is properly processed.
