

# The PC Connection Software Advantage

## » Our Product Selection Is Legendary. Would Our Support Be Any Less?

With almost \$2 billion dollars in buying power, PC Connection has priority access to the biggest IT brands in the industry. This means you get what you want when you need it. Our expert advice, services, and support help you leverage technology to drive down costs, automate resource intensive processes, and improve collaboration in your organization.

With software solutions from assessment and strategy to implementation and licensing support, we're ready to assist your organization with a wide range of projects:

**Security and Data Protection**—Improve system management and security with the help of our software experts.

**Virtualization**—Uncover the full value of virtualization with tools to keep your virtual environment running at optimum efficiency.

**Desktop OS Deployment**—Get the most out of an OS migration with our Windows 7 Assessment Service.

**Volume Licensing**—Our team of licensing specialists can optimize your software budget with the right programs and make licensing easier to manage.

**SaaS/Cloud**—Select and deploy SaaS (Software as a Service) solutions that align with your business and IT strategy.

## A Wide Range of Products and Unparalleled Services

PC Connection has partnered with the industry's top developers to bring you a comprehensive selection of software products, purchasing options, and pricing programs. We support hundreds of licensing programs, but equally important, we help you choose the best licensing options for your particular situation. In addition, our focused offerings address the specialized needs of organizations, including:

- Enterprise, SMB, and very small businesses
- Federal, state, and local government
- Education (higher education and K–12)
- Healthcare
- Charities and non-profit organizations

## Expertise You Can Trust

PC Connection has earned premier authorizations with top software publishers to give you the best selection of licensing options.

### Awards and Certifications

- Microsoft Gold Partner
- Microsoft Authorized Education Reseller (AER)
- Microsoft Delivery Service Partner (DSP)
- Microsoft Large Account Reseller (LAR)

## Microsoft Practice

Ensure that your next Microsoft solution deployment is a smooth one with the support of PC Connection.

We offer:

- Exchange Services
- Desktop Services
- SharePoint Services
- SQL Services
- Windows Server Services
- System Center Suite Services

## Microsoft Enterprise Agreements

If you have at least 250 desktops in your office, we can set you up with a Microsoft Enterprise Agreement (EA)—your all-access pass to simplified licensing, deep discounts on software programs, and locked-in price protection. Enjoy greater discounts, a simplified system for maintaining and provisioning program licensing, and much more.

## Planning and Deployment Made Simple with Microsoft Packaged Services

Our Microsoft Packaged Services allow customers with Value, Select, Select Plus, and Enterprise Software Assurance Benefits to redeem Microsoft Services Vouchers for full deployment planning assessments. This is the perfect way to assess the company-wide deployment of Microsoft solutions such as Windows operating systems, Office, Exchange, and SharePoint.

## Your Software Support Team

The advantage of working with the software experts at PC Connection begins before your purchase and continues long after the sale. When you partner with PC Connection, you receive:

- Education about your options
- Support to help you maximize your investment
- Ease of reporting updates during program review periods
- A team dedicated to your success that you access through a single point of contact—your Account Manager

## Our Software Support Services Include:

- Order and renewal management
- Contract management and administration
- Milestone and compliance management
- Software solution certifications
- Online purchasing
- Client assessment
- License purchase history reporting

## Our Software Lifecycle Services Include:

- Software asset management
- Deployment planning
- Managed infrastructure
- Cloud (SaaS) readiness and migration
