

PC Connection Is Your Mobility Services Partner

» As Enterprise IT organizations evolve more companies see the value of Apple® products. Whether it is in Mac® desktops, notebooks, or iOS devices, Apple is becoming an approved standard throughout many organizations.

One of IT's biggest challenges with this is integrating and managing mixed-platform environments. In a BYOD (Bring Your Own Device) model, developing a forward-looking strategy is key to keeping your organization productive and competitive. We are highly trained and have experience integrating Apple products at all levels of an IT infrastructure.

Solving Unique Integration Challenges

If you are integrating Mac into Active Directory, authentication and incorporation will be a key component of your strategy. Our engineers can work with you to develop and implement the best AD solution for your environment. We can also assist with alternative management solutions.

If you are turning to Apple iPad devices to present leading-edge applications and solutions to your teams and customers, we have a full suite of services to help you implement industry recognized practices throughout the design and implementation of your strategy.

PC Connection®
solving IT one customer at a time™

A critical component to any mobility solution using Apple® iPad® devices, or any iOS device, is to manage and secure them wherever they may be. There are many different products and approaches to a proper Mobile Device Management (MDM) solution, and sorting through them and finding the right set of tools for your organization is not a trivial exercise. Our experienced Mobility Staff will take the guesswork out of the project and work with you to find the solution that best fits your needs.

End-to-End Deployment Solutions

Assessments: A critical component to any large rollout of new hardware is networking. Whether wireless or wired, we can assess, recommend, and install any upgrades or changes that may be required to an environment that may have more wireless devices than human beings.

Image Development: We can assist you in developing custom images for your Mac including pre-loading software, user accounts, configuring all settings, and proper security. We can also assist you in developing and preloading iOS profiles, apps, and settings for iPad and iOS devices

Printing Solutions: Whether it's for Mac or iOS devices, we can assist you in setting up the proper printing solution for your environment.

Security: Mobile devices, tablets, notebooks, and removable storage devices are easily lost or stolen—we can help you secure and protect them.

Off-Site Services: To save you time, storage, and manpower, we offer the following off-site services at our facilities—so when your Apple hardware arrives it's ready to go right out of the box.

All Apple Products:

- Image Loading
- Asset Tagging (with report of all unit information)
- Laser Engraving (logos, print, and scannable barcodes)
- Complete Parts and Accessories Kitting
- Ship to One or Many Locations

iOS Devices: We make it easy for you to design and implement your vision of MDM by offering customized recommendations, the ability to integrate multi-platform solutions, and a one-stop-shop for Apple solutions, third-party products, and integration services. We also offer:

- MDM Enrollment
- Apple iPad Profile Development and Loading
- App Provisioning Through Customer MDM Server

System Management Services: Integrating with current or planned system management tools is key for any IT organization. We can help plan and incorporate the tools that best fit your environment and IT strategy.

- Complete Active Directory Integration
- Integration of Mac-Specific System Management Products
- Design and Integration of MDM Products and Solutions

 Wherever you are in planning your mobility strategy—from concept to final rollout, and everything in-between—PC Connection has got you covered. **Call your Account Manager today for more information.**
