

## Our Expertise

PC Connection works with customers to extend their on-premises and on-campus IT infrastructures to the mobile experiences that today's business requires. Our team can work with you to ensure that the necessary network infrastructure is in place all the way through to securing the data on each device to prohibit unnecessary or unacceptable risk.

Whether your requirements are small or large, we can help you develop the right solution with products and services best suited for your mobile device environment. We support the mobile computing needs of a workforce increasingly on the go. We offer custom configuration, imaging, delivery, and enhanced security solutions for mobile data and devices.

OUR MISSION IS TO CONNECT PEOPLE WITH TECHNOLOGY THAT:

Enhances growth » Elevates productivity » Empowers innovation

### Mobile Readiness Survey

A successful on-campus mobile project is reliant on the wireless network that will support it. Let our team perform a full site survey to help you map out where you have the coverage necessary to succeed and where upgrade or extension of that network will be necessary to achieve success. Our team will architect a solution for you based on our findings and can deliver the full implementation for you to ensure that you don't under or over estimate what's required.

### Mobile Device Management

Whether you are going with a company-owned device strategy or an employee-owned device strategy, you will need to ensure that the registration process and security policies properly govern those devices as they traverse yours and other host networks. Ranging from application delivery and device management policy all the way to user-level restrictions, our team can ensure that your MDM project is a success from day one.

### Mobile Device Security

The first step in any mobility initiative is to ensure proper security, protect corporate data, and comply with regulations. With so many different devices, products, and methods available the choices can seem complex. Our team of specialists can also help you deliver Mobile Content Management (MCM) solutions, which allow businesses to secure document distribution and mobile access to corporate documents through a native mobile app. Let us help you sort through the complexity with our diverse knowledge of today's market and products, so your employees can securely access corporate resources.

### Mobile Deployment Services

Deploying a large number of mobile devices over a large territory can stress the limits of your IT organization and be very costly. Our warehouse and configuration center can make this a budget-friendly and simple exercise and provide you with an ongoing solution.

## Mobility Services
