Our Expertise

With the continuous state of change in the global threat landscape, organizations face cyber-attacks and security breaches that are growing in frequency and sophistication every day. Our Security Practice offers solutions and services to counteract increased risk proliferation. Based on your organization's needs, environment, business processes as well as security goals, our experts will provide insights to help you implement the right solutions to address your critical risks and protect your operations. As an extension of your IT team, we're committed to keeping your organization operating safely and securely.

OUR MISSION IS TO CONNECT PEOPLE WITH TECHNOLOGY THAT:
Enhances growth » Elevates productivity » Empowers innovation

Security Assessment and Audit

Our Security Assessment and Penetration Testing Services help prioritize where you should focus resources to reduce overall risk. We will help you better understand today's real-world threats and how they could affect your organization. A Penetration Test can uncover a myriad of vulnerabilities in any environment. It helps highlight which vulnerabilities are exploitable, which risks are critical and therefore need to be addressed with a high priority, and which items must be remediated over time. Our team identifies and understands the vulnerabilities that exist in your environment, then works with you to develop a prioritized plan to bring that risk in line with acceptable levels in accordance with compliance-based security requirements such as HIPAA, HITECH, ePHI, PCI, GLBA, and FISMA.

Unified Security Stack (Security Suite Optimization)

Industry data shows that more than 30% of all software security solutions are acquired in suites to aid in the unification and implementation of security policies. In other words, where one mechanism leaves off—another one immediately picks up. Our team can help ensure that whether you're using one or multiple security providers, your environment is adequately configured and provides the protection, visibility, and oversight that your organization, users, and data require.

Security Governance, Risk, and Compliance

A multi-step process is needed to develop and implement a comprehensive security management plan. The first step is to have a solid understanding of your environment's security risk level. Let our experts help you identify and document all policies and controls. Then we will help validate an ongoing process to maintain compliance with those policies over time. Our team draws on years of experience and stays abreast of current threats in order to help you develop a well-documented, well-defined security program from investigation to implementation.

Managed Security Services

Does your organization know where it stands in relation to company policies and compliance controls, 24×7×365? Does your security infrastructure provide you the protection, visibility, and oversight to manage security events? Our Security Practice utilizes a proven process and industry-leading tools to continuously monitor and manage your environment. Our team will give you an accurate picture of your risk and a solid foundation to continuously protect, detect, and react to today's sophisticated and constantly evolving security threats.
