PC Connection™
we solve IT™

Our Expertise

PC Connection has qualified experts and decades of experience to help customers build the right solution stack for their organizations. Our team helps you discern the factors that should drive the architectural considerations that in turn should drive your investment. Today's IT strategy is focused on outcomes, and there's no greater source than the software that manages the data and yields the insights that drive our daily work.

OUR MISSION IS TO CONNECT PEOPLE WITH TECHNOLOGY THAT:
Enhances growth » Elevates productivity » Empowers innovation

Messaging Platform Services

A secure, reliable, and resilient messaging architecture is an essential asset for any entity to operate in today's technology-dependent world. Let our experts help you choose the right messaging platform for your needs and implement it according to proven practices.

Whether you're migrating to Office 365, upgrading your on-premises Microsoft Exchange infrastructure, or moving from a legacy to a modern messaging platform, our team can help. Once you're up and running, we will further integrate and performance-tune it for the applications and traffic patterns that exist or may change in your environment.

Infrastructure Software Services

Software versions change often. With every passing launch, upgrade, and end of support there is opportunity, from reconfiguration to redesign. Let our team of experts show you where your infrastructure would benefit from re-architecting the design and deployment of your Windows and Active Directory services.

Once new versions of the core services are in place, continuing to leverage an old Microsoft services design is a missed opportunity. Leverage our team to show you how to get the most from your investment.

Application and Database Services

Today's information architectures are built off of the applications that users navigate to create and manage data. That data then fuels decision-making, personalization possibilities, and ultimately the customer experience. From higher education institutions that want to deliver a great new admissions application to growing commercial entities that need to reach more consumers, the database is at the core of applications.

Our team of experts will ensure that you've implemented your database platform in the most scalable and proven pattern. If you need performance improvements, let us perform a healthcheck to ascertain what optimization is required. For example, if resiliency and failover are your priorities, let us design and build the solution that meets those specs.

Software Services FEATURED PARTNERS:

AirWatch by VMware

Citrix

McAfee

Microsoft

MobileIron

Sophos

Symantec

Veeam
