

Connect with Experts

About Our Cloud Practice

Our team of experts personally engage with customers to build the right hybrid and public cloud solutions. We help discern the factors needed to identify and prioritize the providers that can best host your workloads. Combine the attributes of public cloud capacity with high-performing network connectivity and the option to co-locate hardware, and optimal possibilities evolve.

What's Your IT Strategy?

Get Ready for Next-Generation Cloud

Cloud Storage and Disaster Recovery:

Build a resilient strategy to protect your data.

Desktop as a Service: Put the power of hosted desktops to work for your users.

Unified Communications as a Service: Find a hosted UCaaS solution to meet your needs.

Infrastructure as a Service and Platform as a Service: Migrate to the cloud or a new platform with the right architecture and the right provider.

Connectivity: Get the necessary bandwidth and redundancy to keep your organization running.

Co-location: Find the right facility and location to run your most critical workloads.

ADVICE

The global IT market is quickly moving away from traditional Systems of Record (ERP, CRM, etc.) that perform data capture and toward Systems of Engagement that extend and personalize that data into information. How is this achieved? New enterprise information architectures, finding a way to rebalance IT budgets and skills to create a sustainable cost and operational model for this new way of working. Additionally, Systems of Operation now enable a third realm that takes form through the IoT (Internet of Things) and extended broadband networks. This constant change creates the Operate-Educate-Innovate conundrum that creates operational viscosity within even the best IT organizations. The Cloud Services team helps you work through these types of challenges to find the right solution and a sustainable model to drive long term success.

FUN FACT

Kevin is a USA Hockey, Level 4 certified coach. Kevin has also served as the President and head of player and coach development for his local Little League organization. In his free time, Kevin enjoys working with the youth in his community to help them establish and achieve their goals.
